EXPERIENCE - Full Time

[Probo](#), Gurgaon — Software Engineer - Full-stack

Jun 2024 - PRESENT

NodeJS, Python, MySQL, ReactJS

Product: Real-money opinion trading platform enabling users to predict outcomes on current events across sports, politics, and entertainment.

- Led development of internal tools and scripts to automate payment corrections and support tasks, **boosting operational efficiency**.
- Led a payments-focused backend team to build and scale systems handling **high-traffic prediction events** with low latency and minimal downtime.
- Implemented mobile-number-based bank linking, **enabling 80%+ user migration** from UPI to IMPS and increasing transaction success rate.
- Built and launched a leaderboard with contact sync, enabling in-app connections and ranking, which **boosted user engagement** and profile visits.
- Initiated and led the development of a **freemium trading vertical**, leading the team from concept to launch and scaling it to **60K trades per day**.

Novum (Internal Vertical) is an internal fintech vertical aimed at democratizing options trading through gamified, vernacular-rich experiences for first-time users.

- Developed and deployed **end-to-end notification systems** and **manual file upload workflows**, enhancing user experience and driving cross-platform feature parity.
- Built an **optimized KYC flow**, reducing average user onboarding time to under 10 minutes and directly contributing to **500+ new demat account openings**.
- Boosted app performance and user experience by implementing lazy loading and migrating assets to a CDN, **reducing bundle size by 50%**. Optimized scripts to cut the dynamic stock index update time from **half a day to just 10 minutes**.

[PeopleGrove](#), Remote — SDE II

Sept 2020 - Jun 2024

NodeJS, ReactJS, SailsJS, PostgreSQL

Product: Helps institutions bring personalized, mentor-focused communities to students and alumni from enrollment to long after graduation.

TECHNICAL SKILLS

Current Stack: JavaScript, NodeJS, ExpressJS, SQL

Past Exposure: Open-AI, HTML, CSS, Web A11y, ReactJS, AngularJS, MongoDB, GraphQL, Testing (Jest, Enzyme, Chai), Java, Android, Python, Gatsby, NextJS, MeteorJS, Jotai, React-Query

SOFT SKILLS

Proactive Ownership, Strong Execution Mindset, Leadership, Adaptability, Problem-Solving, Bias for Action

EDUCATION

Bachelor's in Computer Science & Engineering

GGSIU, Delhi, India

2014 - 2018

- Developed a role-based **access control (RBAC) system** with granular admin permissions and audit logging.
- Built an interactive chat widget by **leveraging Open-AI API** and directed them to relevant experts using a custom **expert-matching algorithm**.
- Collaborated with design to implement **WCAG-compliant** components, conducting audits and **securing accessibility certification**.
- Authored migration scripts for large-scale user data updates.
- Integrated Postmark for bulk email delivery, deprecating SendGrid, with custom retry logic and **cost-optimized workflows**.

Successive Technologies, Noida — *Full Stack Developer*

July 2018 - Sept 2020

MERN, MeteorJS, GraphQL

Product: marketcube.io - a SaaS-based marketplace to boost customer engagement and retail experiences.

- Developed and delivered multiple core modules, including notification manager, orders/payments export, dynamic invoices, packing slips, invitation workflows, and shipping models.
- Designed and implemented the **foundational architecture** for a new Apollo-UI application, enabling scalable feature development.
- Built internal tools like a custom CMS and feature flag framework to improve content management and controlled rollouts.
- **Led a team of 13+ engineers** in a **large-scale migration** from Meteor to GraphQL, significantly improving system performance and scalability.

EXPERIENCE - Intern / Part Time

Pesto Tech, Remote — *Tech Mentor - Part Time*

Dec 2022 - Jun 2024

MERN, DSA

Working as a tech mentor for the Plus program. Mentored 17+ students so far in the following technologies: HTML, CSS, JavaScript, NodeJS, ExpressJS, ReactJS, Redux, MySQL, MongoDB, Data Structures, Algorithms, and System Design.

Daphnis Labs, Delhi — *Software Developer Intern*

Dec 2017 - Feb 2018

Android, Java, HTML, CSS, Bootstrap, JS

Developed the features to analyze and manage data in the admin and analytics web panel of the Perb health & fitness Android application.

Coding Blocks, Delhi — *Teaching Assistant Intern*

Sept 2017 - Nov 2017

DSA

Worked as a teaching assistant for the Algorithms & Data Structures course, helping students to clear their doubts in algorithms and data structures. Prepared assignment problems and reviewed students' solution codes to help them write fast and efficient code.
